ENROLLMENT SCRIPT:

Hey Guys! One more thing that's included in working with us, is a business consultation with our partner vendor, Prime Corporate Services.

This is a complimentary consultation that goes right along with your program. During that consultation, they're going to cover three things and talk about three different areas for you.

- 1) They're going to talk about showing you HOW to start a business and actually run and operate as a business, and all the benefits that are included.
- 2) They're going to talk about funding and capital, credit and corporate credit, and how you can build funding and capital off of operating as a business.
- 3) They're going to talk to you about ways of reducing tax liability and how there are some areas they can help from a tax preparation standpoint.

Click the link below and book a call and time. They will cover all of this information for you!
